Accelerate Your Business

Wholesale Billing | Partner Settlement | Least Cost Routing | Fraud Management | Business Intelligence

Telarix iXLink® is the only online community that brings together over 4,000 telecom providers from 200 countries around the world.

iXLink is a secure, reliable, global business collaboration platform that enables communications service providers to quickly access and share critical business information and negotiate deals between carriers more efficiently.

The award-winning iXLink platform is:

- **Robust:** iXLink's proven platform has the power to provide the speed and scalability to address upcoming global business connectivity challenges by connecting with partners, automating repeated processes and eliminating human error.
- **Innovative:** iXLink keeps ahead of the latest trends, as a SaaS solution that offers what no other software vendor in our space can – a 4,000+ strong carrier community, and the tools to help carriers keep in step with today's dynamic communications marketplace.
- **Efficient:** Manage the added challenges brought on by today's complex business environment with automation. Telarix provides end-to-end automation so carriers have the agility to reduce costs, improve efficiencies, and decrease time-to-revenue.

Increased Business Complexity Requires Automation & Insight

iXLink automates and standardizes the exchange of critical telecommunications business information and facilitates the buying and selling of voice, SMS and data between carriers.

Better manage the complexities of your entire telecom business with a complete set of online tools. With the Telarix Unified Suite of iXLink and iXTools, even the most complex contracts and agreements can be completed in minutes, while providing greater accessibility to critical data that makes today's service providers more competitive.

SMS Hub

Grow enterprise revenues and improve efficiencies with this truly end-to-end, business process management for A2P and P2P messaging.

Origin-Based Rating

Dynamically rate, route and bill origin- and destination-based voice calls through seamless integration of the latest price lists and invoices into the Telarix platform

Smart Links

Speed up and streamline your entire trading process, including automated generation of target buy lists, for greater time and cost savings.

Complex Contract Management

Save valuable time with a fully integrated, secure contract management service that enables you to simplify and automate complex contract creation.

Become an iXLink member today!

As an iXLink member, you gain access to a global business communication tool recognized by the largest carriers in the world. iXLink creates an even playing field for all carriers, big or small, to more easily collaborate, for faster reconciliation and dispute resolution – which means quicker order-to-cash.

iXLink members enjoy superior reliability and accuracy when receiving and exchanging business communications such as price lists, non-standard rates and dial-codes, and document discrepancies. Through the advanced analytics of iXLink, carriers also gain greater visibility into their data, for more informed deal making and greater business results.
